EXPERIENCE

Huron

Mar 2025 - Present

Senior Analyst

Remote

- Configured and tested Expenses module, enabling streamlined expense management, automated approval workflows, and enhanced reporting capabilities
- Provided functional expertise in the Business Assets module, including asset tracking, depreciation calculations, and financial reporting
- Assisted in the design and configuration of each functional area while ensuring alignment with business needs and compliance with financial policies and regulatory requirements
- Delivered important executive presentations to help the business evaluate options for critical Workday Financials design choices while clearly outlining impacts to business processes
- Collaborated with stakeholders to gather business requirements and translate them into Workday configuration

FAST Enterprises

Jul 2023 - Aug 2024

Implementation Consultant

Lansing, Michigan

- Developed with .NET 8.0 and .NET Framework 4.8 in C# and VB.NET to complete feature requests and bug fixes
- Designed performance optimized SQL database queries to improve data retrieval and manipulation by over 25%
- Ensured the stability of the product prior to deployment by performing thorough manual testing and debugging
- Demoed new features to the State of Michigan as part of an iterative approach to ensure timely development
- Refactored and modernized legacy code to refine the product and align it with evolving industry standards
- Partook in weekly stand-up meetings and code reviews to deliver progress updates and receive feedback

TensorIoT

Jan 2023 - May 2023

Software Engineer Intern

Remote

- Developed a full-stack mobile app with JavaScript, React Native, HTML, CSS, and various other AWS Services
- Used AWS CDK and CloudFormation to simplify infrastructure provisioning and streamline the deployment process
- Applied Test Driven Development principles when implementing new features to ensure a robust application
- Contributed to UI/UX Design via Figma and used Jira for issue tracking along with providing updates on tasks
- Attended weekly stand-up meetings and participated in code reviews to discuss any obstacles or blockers

EAG

Jan 2022 - Aug 2022

IT Intern

Houston, Texas

- Helped manage IT Infrastructure using Active Directory and VMWare on Windows Server 2022
- Oversaw security using cloud based tools Azure Security and Microsoft Defender for Office 365
- Documented IT processes and procedures by creating SOPs to allow for consistency and improve efficiency
- Troubleshooted and resolved hundreds of OS, server, and network issues within defined service-level agreement
